

Easun Reyrolle Limited

Company:

Easun Reyrolle is an acknowledged leader in the field of electrical power management.

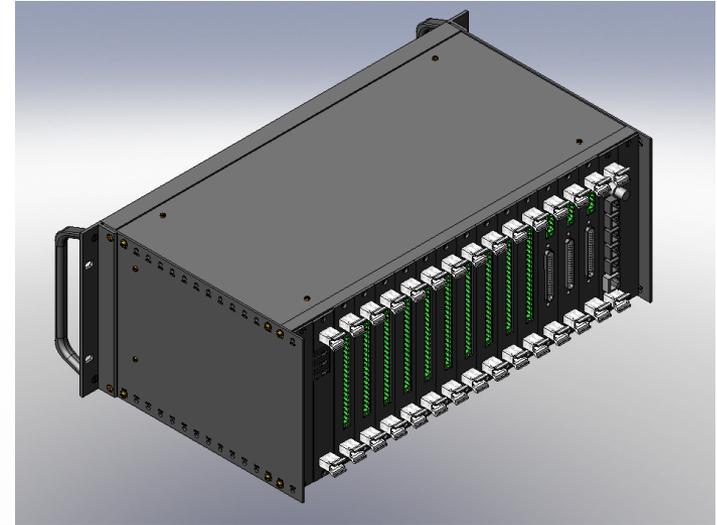

Whether it be in power generation, transmission, distribution or utility, Easun Reyrolle offers products, system, solutions and services to manage these segments with reliability, efficiency and safety.

Challenge:

- Visualizations was not accurate coz we were working on 2D .
- Shorten Design Cycles
- Easun needed a system to simulate the mechanism

Key Benefits:

- Reduced the Design cycle by 80%
- Development and prototyping costs has reduced by 70%
- Reduced design errors by 90%
- Volume of design reuse has improved

"Working in SolidWorks is definitely saving time and money. Our design errors have been reduced by 90% now we have Excellent visualizations of our designs "
