

# Patpert TeknowSystems Pvt. Ltd - Case Study

## COMPANY

**PATPERT TEKNOV SYSTEMS** provides complete engineering solutions from concept to commissioning in field of Process Engineering, Waste Treatment (MSW, Water, Sewage) serving domestic and overseas clients to various Chemical, Food & Pharmaceutical, Sugar Industry and Oil & Gas industries. Patpert has developed innovative technologies to generate alternative fuels.

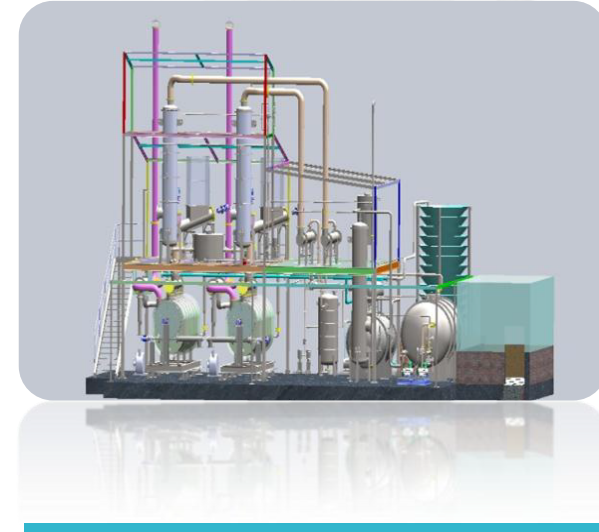

## CHALLENGE

Visualization of general arrangement design involving equipment and facilities to meet the overall needs and in context with the required specifications .

On-time project delivery

## SOLIDWORKS BENEFITS

- Shortened design cycles by 40 percent.
- Accelerated time-to-market by 50 percent.
- Cut development costs by 40 percent.
- Reduced prototyping cycles by 40 percent.
- Helps in routing and Interference detection
- One of our best design and great success product was the Oil Refining Process with 15 Equipment's + Piping which had more than 1000 Components

*“It is best software for 3d modeling and Routing .We choose SolidWorks to speed up the process and in turn increase the productivity .”*

*Yogesh R.Kode  
Director - Technologies*
